LINEAL FOOT CONVERSION CHART

To convert square footage to lineal footage, take square feet multiplied by 12, take that number and divide it by the bevel exposure or net decking width = lineal footage.

To convert square footage to board footage, Thickness X width divided by 12 X square footage = board footage.

To convert board footage to lineal footage, Divide board footage by the factor = lineal footage.

To convert lineal footage to board footage, Multiply lineal footage by the factor = board footage.

1 X 2 = .1667	2 X 2 = .3333	3 X 3 = .75	4 X 4 = 1.3333	5/4 X 2 = .2083	6 X 6 = 3.000
