# TAMLYN®

**FAMILY. VALUE. SERVICE.**

TAMLYN® is proud to celebrate over 50 years of excellence in the building supply industry! In May 1971, Ron Tamlyn, Sr. and his wife Jean took a leap of faith, borrowing \$800 to start the company from a small shed in the backyard of their modest home in Bellaire, Texas. What began as a humble venture has since grown into a globally recognized leader in the industry, with TAMLYN remaining family-owned and operated to this day.

Throughout our history, TAMLYN has built a reputation for quality, innovation, and proven performance, consistently providing products that meet the highest standards. From our early days in Texas to expanding across the globe, we now serve markets in the UK, Asia, South America, and Central America, offering a wide range of building supplies that cater to diverse needs.

At TAMLYN, we are dedicated to maintaining the values that have made us successful: delivering top-quality products, offering competitive prices, and providing excellent customer service. As we look to the future, we continue to honor our commitment to excellence, supporting the growth and success of our customers worldwide.

4th Edition

# **XTREMETRIM<sup>®</sup>**

Exterior Aluminum Trim

**Best Practice**

While we design all our XtremeTrim® with drainage paths for vertical runs and shingle fashion for horizontal profiles, its primary design is for aesthetics. XtremeTrim®, including water management profiles, will not stop all water from penetrating the surface of the cladding. The primary insurance of moisture mitigation for the building envelope is your wrap, preferably a drainable wrap. Other options are to create a rainscreen utilizing furring along with your wrap. We recommend that you consult your siding manufacturer for best practice application when installing XtremeTrim® with their siding. As all building professionals know, water is the most significant factor in the premature deterioration of buildings, and why proper steps should always be taken to protect the envelope.

All standard XtremeTrim® profiles do not form a moisture management system. The architect, builder, designer and contractor are responsible for designing and installing a code compliant building envelope. Below are the current code minimum requirements.

**Tamlyn XtremeTrim® products are not part of an EIFS system and not designed or intended to be used in an EIFS or similar system.**

**INTERNATIONAL RESIDENTIAL CODE****WALL COVERING – SECTION R703 EXTERIOR COVERING****R703.1 General.**

Exterior walls shall provide the building with a weather-resistant exterior wall envelope. The exterior wall envelope shall include flashing as described in Section R703.8

The exterior wall envelope shall be designed and constructed in such a manner that prevents the accumulation of water within the wall assembly by providing a water-resistive barrier behind the exterior veneer as required by Section R703.2 and a means of draining water that enters the assembly to the exterior.

**R703.8. Flashing.**

Approved corrosion-resistive flashing shall be applied shingle-fashion in such a manner to prevent entry of water into the wall cavity or penetration of water to the building structural framing components. The flashing shall extend to the surface of the exterior wall finish. Approved corrosion-resistant flashings shall be installed at all of the following locations.

**EXTERIOR WALLS – SECTION 1403 PERFORMANCE REQUIREMENTS****IBC 1403.2:**

Weather protection. Exterior walls shall provide the building with a weather resistant exterior wall envelope. The exterior wall envelope shall include flashing, as described in Section 1405.3. The exterior wall envelope shall be designed and constructed in such a manner as to prevent the accumulation of water within the wall assembly by providing a water-resistant barrier behind the exterior veneer, as described in Section 1404.2, and a means for draining water that enters the assembly to the exterior. Protection against condensation in the exterior wall assembly shall be provided in accordance with the International Energy Conservation Code.

**Before Installing**

Review construction documents to ensure correct layout and placement of trim. Visually inspect building wrap or rainscreen (where applicable) for proper installation.

An inside corner is the best place to start installing XtremeTrim®.

**Cutting**

Use a non-ferrous carbide miter saw blade when cutting XtremeTrim®.

**Fasteners and Fastening**

Stainless steel fasteners are recommended. XtremeTrim® profiles may be secured in place with a few SS nails until fastened through panels and into studs during panel or plank fastening per siding manufacturer's instructions.

**Incorrect Installation**

Do not install Horizontal trims in a manner where the exterior flange can catch water. Never install vertical or corner trim profiles horizontally.

**Notes**

Please follow siding manufacturer's best practice guides when installing. XtremeTrim® profiles DO NOT form a moisture management system. The architect and builder are responsible for designing and installing a code compliant building envelope. Before installing XtremeTrim® best practices is to use either a drainable wrap or rainscreen assembly, to meet code or possible requirements of siding manufacturer.

**Limited Warranty**

Tamlyn warrants defective-free products for a period of 10 years for the original purchaser unless otherwise stated for the specific product ordered. Tamlyn products are further warranted as to adequacy of design, provided products are properly specified and installed. This warranty does not apply in the event products are altered in any way or are improperly installed. Liability is limited to replacement of products proven to be defective. Tamlyn has made no other warranty, express or implied, regarding its products, including but not limited to, any warranty regarding merchantability or fitness for a specific purpose. Any claim that a product is defective must be brought within one (1) month of the date of installation of such products by the original purchaser. Customer hereby agrees that no other incidental or consequential damages are the responsibility of Tamlyn.

The following voids any warranty regarding Tamlyn products:

- Product has been improperly installed
- Accepted siding installation methods have not been followed
- Building codes have not been followed
- The building envelope has not been properly installed
- Products not installed by a contractor/installer with common knowledge of the building industry

Responsibility remains with the architect or engineer, contractor and owner for the design, application and proper installation of each Tamlyn product. Specifier and user shall determine the suitability of products for specific application and assume all responsibilities in connection there within.

Aluminum does not rust, however it does corrode. XtremeTrim® has a protective coating to cover the bare aluminum. When making cuts on XtremeTrim® recoating will be required at ends, surface scratches or when performing form cuts. Failure to do this voids your warranty. For answers to your technical questions on recoating consult your local paint manufacturer before installation.

**Please follow siding manufacturers best practice application when installing any Tamlyn accessory. XtremeTrim® profiles do not form a moisture management system, the architect and builder are responsible for designing and installing a code compliant building envelope. XtremeTrim® products are not part of an Exterior Insulation Finishing System (EIFS) and are not designed or intended to be used in an EIFS or similar system.**

# TAMLYN®

**FAMILY. VALUE. SERVICE.**

Tamlyn® continues to lead the way in selection and choice for extruded aluminum trims to complement siding materials of all types.

Tamlyn® has made it possible to aesthetically trim almost any type of siding product with our wide range of depth options. And we have provided these in choices of primed, clear anodized, specialty anodized, or color matched to satisfy whatever the project requires.

XtremeTrim® has thousands of design and color options, allowing architects and users to dramatically improve their building aesthetics and create modern architectural lines. Sustainable, durable, non-combustible, lightweight, easy to use. Tamlyn® has our own team of in-house architects to aid and assist the process of selecting and assuring the correct profile for the specific application or desired aesthetic effect.

But Tamlyn® does not stop there in the selection and leadership process. Tamlyn® has the ability and materials in-house to provide appropriate non-extruded fabrication from sheet stock of almost any shape profile, or color that may be needed on the project.

Ever run short a few pieces on a big job to finish, get paid and avoid huge delay or project fines? Contact TAMLYN® and put our XtremeService to the test.

corrosion resistant  
galvanized

**DRILL**  
with stainless steel  
fasteners

**LEVEL**  
helps ensure that lines  
are entirely straight.

- Review and follow **local building code**
- Refer to panel/siding manufacturer install instructions for **fastening, substrate requirements and clearances**
- Store in a **dry area** protected from weather
- Refer to **Construction Documents** for profile layout

### STARTING POINT.

- Install Inside Corner.
- Install first panel into corner – leveling and adjusting as needed

### INSTALL SUBSEQUENT PANELS AND VERTICAL TRIMS ALONG A HORIZONTAL PATTERN.

- Note: Trims are not structural

### INSTALL PANELS AND VERTICAL TRIMS TO NEXT CORNER, THEN INSTALL HORIZONTAL TRIM AND MOVE UPWARDS.

- Fasten one side

**AT INTERSECTION OF HORIZONTAL TO INSIDE AND OUTSIDE CORNER, FOR BETTER FINISH AESTHETICS, NOTCHING TECHNIQUES MAY BE USED.**

- Outside corner with notched XZH (Horizontal Z)
- Outside corner notched with RH (Horizontal Reveal)

Outside corner with notched XZH

Outside corner notched with RH

**WHEN INSTALLING WITH HORIZONTAL Z MOST DESIGNS CALL FOR 1/2" CORRESPONDING REVEAL; WHICH IS ACHIEVED BY HOLDING NEXT COURSE OF PANELS AND VERTICAL TRIM UP OFF THE HORIZONTAL.**

- A small cut off of the vertical reveal can be used as a spacer

### PRIMED FINISH STANDARD

XtremeTrim® extruded profiles are provided standard with a primed finish using a proprietary primer suitable for field painting using most paint materials. Ideal application is with a direct-to-metal alkyd enamel. Consult your local paint manufacturers for best practice and proper paint selection and application.

### ANODIZED FINISHES

Tamlyn stocks Clear Anodized (Architectural 202R1) in almost all extruded profiles. In addition, other anodized finishes such as Dark Bronze, Medium Bronze, Light Bronze, or Black are available as special order. All anodized finishes are provided within an industry range of color consistency and can vary slightly from item to item.

Special order anodized colors are subject to specific minimum set up fees and cost depending upon quantity. Anodizing is an electrochemical conversion process that deposits an oxide film on the aluminum profile. A natural oxidation process occurs on all bare aluminum, however, producing the oxidation process artificially through anodizing creates a thicker, harder, and more durable oxide film which is an extremely durable finish resistant to most forms of airborne corrosion.

### ANODIZED SPECIFICATIONS

**Standard Clear Anodized – Architectural 202R1 medium etch (AA-M32CA21).** Thickness of anodic coating shall be tested in accordance with ASTM B-244-68.

**Color Anodized Finish – two step impregnated color Class II Architectural of 0.40-0.70 mils (AAM12C22A33)** Thickness of anodic coating shall be tested in accordance with ASTM B-244-68.

Tamlyn also provides Clear Anodized fabricated profiles in 0.040 sheet stock to compliment the extruded Clear Anodized profiles.

### POWDER COATING

Powder coating is an advanced method of applying finish to products. The powder used for the process is a mixture of finely ground particles of pigment and resin, which is sprayed onto a surface to be coated. The charged powder particles adhere to the electrically grounded surfaces until heated and fused into a smooth coating in a curing oven. The result is a uniform, durable, high-quality, and attractive finish.

Powder coating gives the longest-lasting and most color-durable quality finishes available. Powder coated surfaces are more resistant to chipping, scratching, fading, and wearing than other finishes.

Tamlyn powder coats in-house to match all major pre-finished siding colors. Quantity limits apply for custom color powder coat processing.

### TRADITIONAL WET PAINT PROCESSING

Tamlyn also can provide traditional wet paint process for custom colors. This is advantageous often for smaller volume orders. The color control and matching can be precisely managed to assure consistency throughout a job or project. Minimum quantity limits apply for all color matches.

**Colors shown are illustrated as accurately as printing methods will permit. Please utilize actual product samples for true color comparison.**

	Aged Pewter		Timber Bark
	Arctic White		Traditional Red
	Autumn Tan		Woodland Cream
	Black		Woodstock Brown
	Boothbay Blue		
	Cobble Stone		
	Countrylane Red		
	Dark Bronze		
	Deep Ocean		
	Evening Blue		
	Granite Gray		
	Gray Slate		
	Heathered Moss		
	Iron Gray		
	Khaki Brown		
	Light Mist		
	Monterey Taupe		
	Mountain Sage		
	Navajo Beige		
	Night Gray		
	Pearl Gray		
	Rich Espresso		
	Sail Cloth		
	Sandstone Beige		

**Any other color you imagine is also available from TAMLYN. Want to match a school or corporate color scheme, we can make it happen!**

With all color processes there is an allowable variance tolerance that applies to painting and use of dissimilar substrate materials to which paint is applied. Pre-matched colors on many siding products are considered to be stock matched from TAMLYN and do not require signed match approval for processing. Any other colors must have signed/accepted hand matches completed prior to order processing/acceptance. The colors above are examples of the majority of current ready matched shades. Almost any other color can be matched. There are quantity minimums for all orders of color processing. Paint variances from lot to lot WILL occur and on large projects it is recommended that all color items be ordered at one time.

**2 PIECE SYSTEM**

# RVC

All measurements are nominal

ITEM ID	A	B	C
RVC516	1/2"	5/16"	1/2"
RVC34	5/8"	3/4"	3/4"
RVC716	1/2"	7/16"	1/2"

All parts are 10' Length unless otherwise indicated

## DESIGN FEATURES

Designed to create a uniform, aesthetically consistent vertical reveal between siding. The 2-Piece design permits application of the base part first and then installation of the cover cap at a later time. In tight fit situations this may be more convenient than using the standard vertical reveal. However, due to the natural expansion and contraction of aluminum, all 2-Piece RVC caps must be secured by either adhesive or screw or pop rivet.

Recommended adhesive needs to meet these requirements:

Tensile Strength: ASTM D412 - 475 psi

Lap Shear Strength: ASTM D1002 - 550 psi

## MATERIAL

6063-T5 .045" ± .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

## NOTES

Do not install XtremeTrim® Vertical Reveal on horizontal applications where the exterior flange can catch/hold water.

**DESIGN FEATURES**

Designed to create a uniform, aesthetically consistent vertical reveal at transitions between panel and lap siding. The 2-Piece design permits application of the base part first and then installation of the cover cap at a later time. In tight fit situations this may be more convenient than using the standard vertical reveal. However, due to the natural expansion and contraction of aluminum, all 2-Piece RVC caps must be secured by either adhesive or screw or pop rivet.

Recommended adhesive needs to meet these requirements:

Tensile Strength: ASTM D412 - 475 psi

Lap Shear Strength: ASTM D1002 - 550 psi

**MATERIAL**

6063-T5 .045" ± .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

**NOTES**

Do not install XtremeTrim® Transition Vertical Reveal on horizontal applications where the exterior flange can catch/hold water.

All measurements are nominal

ITEM ID	A	B
RVC51634	5/16"	3/4"

All parts are 10' Length unless otherwise indicated

# SHC

All measurements are nominal

ITEM ID	A	B
SHC516	1"	5/16"

All parts are 10' Length unless otherwise indicated

## DESIGN FEATURES

Designed to cover vertical joints in siding. Provides a smooth seam. The 2-Piece design permits application of the base part first and then installation of the cover cap at a later time. In tight fit situations this may be more convenient than using the standard vertical reveal. However, due to the natural expansion and contraction of aluminum, all 2-Piece SHC caps must be secured by adhesive.

Recommended adhesive needs to meet these requirements:

Tensile Strength: ASTM D412 - 475 psi

Lap Shear Strength: ASTM D1002 - 550 psi

## MATERIAL

6063-T5 .045" ± .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

## NOTES

Do not install XtremeTrim® Siding H Mold on horizontal applications where the exterior flange can catch/hold water.

## DESIGN FEATURES

Provides a clean open outside corner which complement the Vertical Reveal System. The 2 Piece design permits application of the base part first and then installation of the cover cap at a later time. In tight fit situations this may be more convenient than using the standard outside corner. However, due to the natural expansion and contraction of aluminum, all 2-Piece COCR caps must be secured by either adhesive or pop rivet.

Recommended adhesive needs to meet these requirements:

Tensile Strength: ASTM D412 - 475 psi

Lap Shear Strength: ASTM D1002 - 550 psi

## MATERIAL

6063-T5 .045" ± .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

## NOTE

Do not install XtremeTrim® Reveal Open Outside Corner on horizontal applications where the exterior flange can catch/hold water.

All measurements are nominal

ITEM ID	A	B
COCR516	5/8"	3/8"

All parts are 10' Length unless otherwise indicated

# COCLP

All measurements are nominal

ITEM ID	A	B
COCLP516	3/4"	3/8"

All parts are 10' Length unless otherwise indicated

## DESIGN FEATURES

Clean outside corner for vertical siding panels. Works well with all vertical options. The 2-Piece design permits application of the base part first and then installation of the cover cap at a later time. In tight fit situations this may be more convenient than using the standard outside corner. However, due to the natural expansion and contraction of aluminum, all 2-Piece COCLP caps must be secured by adhesive.

Recommended adhesive needs to meet these requirements:

Tensile Strength: ASTM D412 - 475 psi

Lap Shear Strength: ASTM D1002 - 550 psi

## MATERIAL

6063-T5 .045" ± .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

## NOTE

Do not install XtremeTrim® Low Profile Outside Corner on horizontal applications where the exterior flange can catch/hold water.

**DESIGN FEATURES**

Produces a clean, durable inside corner for siding panels. The 2-Piece design permits application of the base part first and then installation of the cover cap at a later time. In tight fit situations this may be more convenient than using the standard inside corner. However, due to the natural expansion and contraction of aluminum, all 2-Piece CICLP caps must be secured by adhesive.

Recommended adhesive needs to meet these requirements:

Tensile Strength: ASTM D412 - 475 psi

Lap Shear Strength: ASTM D1002 - 550 psi

**MATERIAL**

6063-T5 .045" ± .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion.

For all other finish options refer to page 18.

All measurements are nominal

ITEM ID	A	B

JMR516	3/8"	3/8"

All parts are 10' Length unless otherwise indicated

# JMS

All measurements are nominal

ITEM ID	A	B
JMS5168	3/8"	5/16"
JMS7168	3/8"	7/16"
JMS588	3/8"	5/8"

## DESIGN FEATURES

Provides a clean finish at openings, edges of panels and at material transitions. True size designed as an independent profile. Use as a closure/cap piece only.

## MATERIAL

6063-T5 .040"  $\pm$  .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

## NOTE

Do not install XtremeTrim® Basic J Mold on horizontal applications where the exterior flange can catch water.

DESIGN FEATURES

Provides a clean finish at openings, at the edge of various siding materials, and at material transtions while creating a reveal break. Complement the Vertical Reveal System.

MATERIAL

6063-T5 .050 " ± .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

NOTE

Do not install XtremeTrim® F Reveal on horizontal applications where the exterior flange can catch/hold water.

All measurements are nominal

ITEM ID	A	B	C

FR716	3/8"	15/32"	1/2"
FR34	5/8"	3/4"	3/4"
FR3412-38	3/8"	3/4"	1/2"

All parts are 10' Length unless otherwise indicated

## F

All measurements are nominal

ITEM ID	A	B
F516	1/2"	5/16"

All parts are 10' Length unless otherwise indicated

## DESIGN FEATURES

Provides a clean finish at openings, at the edge of various siding materials, and at material transitions while creating a reveal break. Complement the Bead System.

## MATERIAL

6063-T5 .050"  $\pm$  .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

## NOTE

Do not install XtremeTrim® F Trim on horizontal applications where the exterior flange can catch/hold water.

### DESIGN FEATURES

Simple angle trim that can be adaptively used for multiple applications such as transition from panel to siding. Can also be used for facade/soffit transition and as an abutted stop alongside windows and doors.

### MATERIAL

6063-T5 .045 "  $\pm$  .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

### NOTE

Do not install XtremeTrim® L Trim on horizontal applications where the exterior flange can catch/hold water.

All measurements are nominal

# XHM

All measurements are nominal

ITEM ID	A	B
XHM148	1/2"	9/32"
XHM5168	1/2"	11/32"

All parts are 10' length unless otherwise indicated

## DESIGN FEATURES

Covers the seams of the soffit material providing a cleaner transition than simply butting the panels end-to-end.

## MATERIAL

6063-T5 .040 "  $\pm$  .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

## NOTE

Do not install XtremeTrim® Soffit H Mold horizontal applications where the exterior flange can catch/hold water.

**DESIGN FEATURES**

Starter/bottom course best for lap siding. Provides ease-of-installation with correct angle. Also works with panel siding.

**MATERIAL**

6063-T5 .040"  $\pm$  .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

Also works with panel siding

XWF112	1-1/4"	1-1/2"
XWF158	1-1/4"	1-5/8"
XWF2	2"	2"

All parts are 10' Length unless otherwise indicated

\*In Stock in BLACK ANODIZED

## DESIGN FEATURES

Provides an easy to install and long-lasting method of minimizing water penetration. Used over window trim, band boards, panel intersections, and material transitions.

## MATERIAL

6063-T5 .050 "  $\pm$  .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

## NOTE

Do not install XtremeTrim® Window Flashing on horizontal applications where the exterior flange can catch/hold water.

DESIGN FEATURES

Concrete T-Astragal Drip extrusions act as an integral concrete form; typical applications are the edge conditions of balconies and breezeways. The aluminum surface gives a quality aesthetic, the material is excellent against corrosion, and different finish options allow for design flexibility

MATERIAL

6063-T5 .055" ± .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion. For all other finish options refer to page 18.

# SPECIAL ORDER ITEMS

## VERTICAL BATTEN REVEAL | RVBN

Unique design duplicates the look of a wood batten without the maintenance headaches while serving as a rust proof flashing between vertical siding. Design does not protrude beyond panel.

## VERTICAL BOARD REVEAL | RVB

Design creates a broad vertical accent between siding panels while not protruding beyond the plane of the facade.

## HORIZONTAL BOARD REVEAL | RHB

Design creates a broad horizontal accent within the plane of the wall without protruding beyond. Patented retention leg on the back prevents flexing with expansion. **US Patent #6,018,924**

## 1 X 2 BOARD OUTSIDE CORNER | XOC12

An outside corner that replicates a 1" x 2" for Board and Batten or Lap.

## VERTICAL BOX T MOLD | TMB

Vertical Box T Mold serves as a wider, distinct joint between panels.
